

Before the  
FEDERAL COMMUNICATIONS COMMISSION  
Washington, DC, 20554

In the Matter of                    )  
Creation of a Low                    )  
Power Radio                        )  
Service                                )                   MB Docket No. 99-25

My name is Gary Turk, and I strongly support any actions the  
Federal Communications Commission can take to expand and support  
the Low Power FM radio service.

Specifically, please allow rural communities to have the  
originally proposed 1000 watts instead of 100 watts that was  
allocated due to the lobbies of NAB and NPR. The station I listen  
to, WXCS-LP 92.9, has VERY limited range due to encroachment by  
stations in Buffalo and Pittsburgh, both of which are over 100  
miles away.
